SUSY 2018

The goal of the International Conference on Supersymmetry and Unification of Fundamental Interactions (SUSY) is to review and discuss recent progress in theoretical, phenomenological, and experimental aspects of supersymmetric theories and other approaches to physics beyond the Standard Model of particles and interactions.

SUSY is one of the world's largest international meetings devoted to new ideas in fundamental particle physics.

The 27th International Conference on Supersymmetry and Unification of Fundamental Interactions (SUSY 2018) is organised by the [Institut de Física d'Altes Energies \(IFAE\)](#). The meeting will be held at the Hotel Plaza in Barcelona.

PRE-SUSY School 2018

The week before SUSY 2018 (July 17th - 20th, 2018) the **Pre-SUSY school** will take place at the [Universitat Autònoma de Barcelona](#).

This summer school is meant primarily for advanced graduate students and postdocs and consists of a series of lectures on selected topics of BSM theories and LHC phenomenologies. Find more information about the Pre-SUSY school in the left menu.
